

Welcome to the Penn State Heart and Vascular Institute, the only integrated program in Central Pennsylvania providing a comprehensive focus on cardiac and vascular disease. I am Dr. Peter Waybill, and I have the privilege of being the Director of the Cardiovascular Imaging for the Institute.

Within the Penn State Heart and Vascular Institute specialists from Radiology, Cardiology, and Surgery combined their skills to image and diagnose diseases of the heart and vascular system. All imaging modalities are available to our specialists for the diagnosis, and treatment, of cardiac and vascular disease. Imaging modalities include: vascular duplex sonography, echocardiography, CT (computed tomography) angiography, cardiac and coronary CTA, MR (magnetic resonance) angiography, cardiac MR, nuclear medicine imaging, and diagnostic and therapeutic angiography.

I hope you will feel free to contact me and my colleagues in the Cardiovascular Imaging Program if you have any questions or concerns regarding your cardiovascular health.

Sincerely,
Peter N. Waybill MD
Associates Professor of Radiology, Medicine, and Surgery
Program Director, Cardiovascular Imaging
Chief, Cardiovascular and Interventional Radiology
Penn State Heart and Vascular Institute
