**Duration:** 12 months.

**Deadline:** January 11, 2006

#### [The Harry Frank Guggenheim Research Grant](#)

The Foundation welcomes proposals from any of the natural and social sciences and the humanities that promise to increase understanding of the causes, manifestations, and control of violence, aggression, and dominance. Highest priority is given to research that can increase understanding and amelioration of these urgent problems in the modern world. Priority also will be given to areas and methodologies not receiving adequate attention and support from other funding sources. Grants are made to individuals, not to institutions. The Foundation ordinarily makes awards from \$15,000-\$35,000 a year for 1-2 year. All awards are for one-year terms initially. Further funding requires annual applications for continuation of support. Final reports are mandatory within six months after the end of the grant period. Grants are usually made to senior scholars with PhD or MD degrees and a considerable track record for research on violence and aggression. Only original pieces of research on significant social problems related to violence and aggression solicited.

**Deadlines:** August 1 for a decision in December
